DETAILED ACTION

Claim Objections

1. Claims 1-16 are objected to because of the following informalities: throughout the claims, it is suggested that the use of the pronoun such as the term "it" be limited and further be amended with its particular reference. For example, in claim 1, on line 6, the recited term "it" be amended to --the method--.

Also in claim 12, the reference numeral (11) is used for the detection means which is same for the heating means (11). Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 12 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Gaspard (US 5,808,280)

Gaspard shows the structure claimed including a cooktop including heating means consisting of inductors which form the detection means for detecting the presence of a container in a two-dimensional array.

With respect to the recited heating method, it is noted such method relates as a manner of operating the device or structure that does not differentiate the apparatus/structure claim from the applied Zapf reference, i.e., the apparatus claim must be structurally distinguishable from the prior art.

Art Unit: 3742

4. Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by Zapf (US 6,184,501)

Zapf shows the structure claimed including a cooktop including heating means associated with inductors forming induction detection means for detecting the presence of a container in a two-dimensional array.

With respect to the recited heating method, it is noted such method relates as a manner of operating the device or structure that does not differentiate the apparatus/structure claim from the applied Zapf reference, i.e., the apparatus claim must be structurally distinguishable from the prior art.

Allowable Subject Matter

5. Claims 1-11 and 14-16 are allowable except for informalities under the claim objection.
